

ADDENDA TO IB-24926

TO INCLUDE A WESTINGHOUSE MOTOR

Some MI-1313 and MI-1305-1 Projector-Amplifiers contain a motor manufactured by the Westinghouse Company which differs slightly from the motor illustrated in the Service Manual IB-24926.

The replacement parts on the Westinghouse motor are different from and not interchangeable

with those parts on the other motor made by EMC. The two motors can be easily identified by means of the name plates attached to the motors.

The Westinghouse motor—installed—and its replacement parts are shown in Figures 1 and 2.
